# FULL SYNTHETIC MOTOR OIL

MAG 1® Full Synthetic Motor Oil is our purest and most advanced formulation. MAG 1® with FMX® Technology provides unsurpassed protection in every viscosity. Even our lowest viscosity oils protect better than thick oils of the past.
Provides the following benefits:

- Engineered to improve fuel mileage and to maximize horsepower and acceleration.
- Longer and better engine protection than conventional oils due to strong and uniform synthetic base oils and advanced molecules that provide a strong film barrier to control friction, resist wear and keep metal surfaces from coming into contact.
- Extended oil drain intervals. -- Meets or exceeds API SP and ILSAC GF-6A requirements.
- ENVIRO BOX® - Improves inventory management & reduces the amount of plastic used compared to quart bottles. (less trash) The cardboard box is 100% recyclable and maximize space previously used for one 55 gallon drum.

- Designed to be a universal, multi-purpose lubricant for farm, construction, and logging equipment.
- 4 applications found in common reservoirs that contain wet brakes, hydraulics, final drives, and transmissions.
- This product is ideally suited for equipment that may be aging and requires frequent fluid replacement.
- Not recommended for equipment manufactured after 1974.

# GEAR LUBRICANT

### # 527-6080 ~ Federated Gear Lubricant - QUART

- Federated 80W-90 gear oil is specially formulated with only the finest quality, hydro treated, high viscosity index, paraffinic base oils and the most advanced and rigorously-tested additive system to deliver unsurpassed protection and performance..
- Exceptional protection against spalling and other wear, especially under extreme heat, pressure and torque.
- Maintains viscosity, even under extreme operating temperatures, resulting in longer fluid life & reduced operating costs.
- Foam protection.

### MAG1 Gear Lubricant - 5 GALLON PAIL

- Specially formulated for multipurpose, extreme pressure applications, including conventional differentials, gear boxes, limited slip rear axles, manual transmissions and hypoid gears.
- Advanced additive system, which includes extreme pressure, anti-wear and anti-friction agents, and oxidation and corrosion inhibitors.
